The United Nations Sustainable Development Goals (UN SDGs) are a set of 17 global goals adopted by all United Nations Member States in 2015 as part of the 2030 Agenda for Sustainable Development. These goals address a wide range of interconnected issues, including poverty, hunger, health, education, gender equality, clean water, and climate action.

The SDGs provide a comprehensive framework for countries, businesses, and individuals to work towards a more sustainable and equitable future. Organizations often highlight their efforts aligned with specific SDGs to showcase their commitment to responsible and sustainable business practices.
